

## Early Journal Content on JSTOR, Free to Anyone in the World

This article is one of nearly 500,000 scholarly works digitized and made freely available to everyone in the world by JSTOR.

Known as the Early Journal Content, this set of works include research articles, news, letters, and other writings published in more than 200 of the oldest leading academic journals. The works date from the mid-seventeenth to the early twentieth centuries.

We encourage people to read and share the Early Journal Content openly and to tell others that this resource exists. People may post this content online or redistribute in any way for non-commercial purposes.

Read more about Early Journal Content at <http://about.jstor.org/participate-jstor/individuals/early-journal-content>.

JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact [support@jstor.org](mailto:support@jstor.org).

# P R E S E N T S

RECEIVED BY THE

## ROYAL SOCIETY,

*From November 1811 to June 1812,*

WITH THE

### NAMES OF THE DONORS.

1811.	P R E S E N T S.	D O N O R S.
<i>Nov. 7.</i>	Valor Ecclesiasticus. Temp. Henr. VIII. Auctoritate Regia Institutus Vol. I. fol.	The Commissioners of Public Records.
	Rotulorum Originalium in Curia Scaccarii Abbreviatio. Vol. II. Tempore Regis Edwardi III. fol.	
	Libri Censualis vocati Domesday Book Indices. fol.	
	Placitorum in Domo Capitulari Westmonasteriensi asservatorum Abbreviatio. Temporibus Regum Ric. I. Johan. Henr. III. Edw. I. Edw. II. fol.	
	An Account of the Trigonometrical Survey, carried on by Order of the Master General of his Majesty's Ordnance in the Years 1806—1809, by Lieut. Col. Wm. Mudge, and Capt. Tho. Colby. 4°	Lieut. Col. Wm. Mudge.
	Transactions of the Geological Society, established Nov 13, 1807. Vol. I. 4°	The Geological Society.
	Asiatic Researches, or Transactions of the Society instituted in Bengal, for inquiring into the History and Antiquities, the Arts, Sciences, and Literature of Asia. Vol. X. and XI. 4°	Asiatic Society.
	The Transactions of the Linnean Society of London. Vol. X. Part II. 4°	The Linnean Society.
	Medico Chirurgical Transactions, published by the Medical and Chirurgical Society of London. Vol. I. 8°	The Medical and Chirurgical Society.
	Hortus Elginensis, or a Catalogue of Plants, indigenous and exotic, cultivated in the Elgin Botanic Garden in the Vicinity of the City of New York, by David Hossack, M. D. &c. 2 copies. 8°	Dr. David Hossack.

1811.

PRESENTS.

- Nov. 7.* A Statement of Facts relative to the Establishment and Progress of the Elgin Botanic Garden, and the subsequent disposal of the same to the State of New York, by David Hossack, M. D. 2 copies. 8°  
 Lectures on the Elements of Algebra, by the Rev. Bewick Bridge. 8°  
 A compendious and practical Treatise on the Construction, Properties, and Analogies of the Three Conic Sections, by the Rev. Bewick Bridge. 8°  
 A Journal of Natural Philosophy, Chemistry, and the Arts. No. 134—138. 8°  
 The Philosophical Magazine for July, August, September, and October, 1811. 8°  
 The Critical Review for July, August, September, and October, 1811, and Appendix to Vol. XXIII. 8°  
 Recherches Physico Chimiques, par M. M. Gay Lussac et Thenard. 2 Vols. 8°  
 Projet d'une Académie Asiatique. 4°  
 Nouvelles Méthodes pour la Détermination des Orbites des Comètes, avec un Supplement, &c. par A. M. Legendre. 4°  
 Essai sur la Théorie des Nombres, par A. M. Legendre. 4°  
 Théorie de la Double Refraction de la Lumière dans les Substances Cristallisées, par E. L. Malus. 2 copies. 4°  
*Nov. 14.* L'Allegro Miltoni Poema Latine Redditum a C. M. 4°  
 Meteorological Journal and Astronomical Observations made at the Observatory at Madras in 1810. MS.  
 Directions for Sailing to and from the East Indies, China, New Holland, Cape of Good Hope, and the interjacent Ports, &c. by James Horsburgh, Esq. F. R. S. Part II. 4°  
*Nov. 21.* A Continuation of an Account of Indian Serpents. Vol. II. Part III. and IV. fol.  
 A Dictionary of the Malayan Language, by Wm. Marsden, Esq. F. R. S. 4°  
 Table to calculate Interest and Salaries.  
*Dec. 5.* The Philosophical Magazine for Novemb. 1811.  
 A Journal of Natural Philosophy, Chemistry, and the Arts. No. 139. 8°  
 The Critical Review for November, 1811.  
 The Botanist, being the Botanical Part of a Course of Lectures on Natural History, by Benjamin Waterhouse, M. D. 8°

DONORS.

- Dr. David Hossack.  
 Rev. Bewick Bridge.  

---

 Mr. W. Nicholson.  
 Mr. A. Tilloch.  
 The Proprietor.  
 M. M. Gay Lussac and Thenard.  
 By the Author.  
 M. Legendre.  

---

 M. E. L. Malus.  
 C. Marsh, Esq.  
 Court of Directors of the Hon. East India Company.  
 James Horsburgh, Esq.  
 Court of Directors of the Hon. East India Company.  
 Wm. Marsden, Esq.  
 — Goodwin, Esq.  
 Mr. A. Tilloch,  
 Mr. W. Nicholson.  
 The Proprietor.  
 Dr. B. Waterhouse.

1811.	PRESENTS.	DONORS.
<i>Dec. 5.</i>	Base du Système Métrique Decimal, ou Mesure de l'Arc du Méridien compris entre les Parallèles de Dunkerque et Barcelone, par M M. Mechain et Delambre. Tome III. 4°	Institute of France.
1812.		
<i>Jan. 9.</i>	The Life of the Rev. John Hough, D. D. Bishop of Oxford, &c. by John Wilmot, Esq. F. R. S. &c.	John Wilmot, Esq.
	Medico Chirurgical Transactions, published by the Medical and Chirurgical Society of London. Vol. II. 8°	The Medical and Chirurgical Society.
	An Inquiry into the Process of Nature, in repairing Injuries of the Intestines, &c. by Benjamin Travers. 8°	Benj. Travers, Esq.
	The Life of the Right Rev. Beilby Porteus, D. D. late Bishop of London, by the Rev. Robert Hodgson, A. M. F. R. S. &c. 8°	Rev. Robert Hodgson.
	Dissertatio historico-critica de Mistionum Chemicarum simplicibus et perpetuis rationibus earumque Legibus nuper detectis Sectio I. Auctore Lud. Guill. Gilbert. 4°	D. L. G. Gilbert.
	Siao gu lin; or a small Collection of Chinese Characters analysed and decomposed, &c. by Stephen Weston, B. D. F. R. S. 8°	Rev. Stephen Weston.
	Philosophical Magazine for December, 1811.	Mr. A. Tilloch.
	A Journal of Natural Philosophy, Chemistry, and the Arts. No. 140—141.	Mr. W. Nicholson.
	The Critical Review, for December, 1811.	The Proprietor.
23.	A Survey of the South Coast of China, and of the Paracels, by Lieut. Ross and Maughan. 9 Sheets.	Court of Directors of the Hon. East India Company.
	State of the Prisons in England, Scotland, and Wales, by James Neild, Esq. 4°	The Society for the Discharge and Relief of Persons imprisoned for Small Debts
	A new Interpretation of the 86th Psalm, and an Exposition of the 110th Psalm, by the Rev. Richard Dixon, A. M. F. R. S.	The Rev. Rich. Dixon.
<i>Feb. 6.</i>	Archaeologia, or Miscellaneous Tracts relating to Antiquity, published by the Society of Antiquaries of London. Vol. XVI. 4°	Society of Antiquaries.
	A Journal of Natural Philosophy, Chemistry, and the Arts. No. 142.	Mr. W. Nicholson.
	The Philosophical Magazine for January, 1812.	Mr. A. Tilloch.
	The Critical Review for January, 1812, and Appendix to Vol. XXIV.	The Proprietor.
	A Lamp, called the Illuminator.	Benj. Count Rumford.
13.	An Essay upon the Hydatids of the Human Body, by Alex. Munro, jun. M. D.	Dr. A. Munro, jun.
	The Mausoleum at Castle Howard.	The Earl of Carlisle.
<i>Mar. 5.</i>	A Journal of Natural Philosophy, Chemistry, and the Arts. No. 143.	Mr. W. Nicholson.

1812.	PRESENTS.	DONORS.
<i>Mar. 5.</i>	The Philosophical Magazine for February, 1812. The Critical Review for February, 1812.	Mr. A. Tilloch. The Proprietor.
19.	Travels in the Island of Iceland during the Summer of the Year 1810, by Sir George Steuart Mackenzie, Bart. F. R. S. 4°	Dr. Henry Holland.
<i>Apr. 9.</i>	An elementary Treatise on Astronomy, by Robert Woodhouse, A. M. F. R. S. 8°	Robert Woodhouse, Esq.
	The Philosophical Magazine for March, 1812.	Mr. A. Tilloch.
	A Journal of Natural Philosophy, Chemistry, and the Arts. No. 144.	Mr. W. Nicholson.
	The Critical Review for March, 1812.	The Proprietor.
16.	A Meteorological Journal kept on Board the Marine Society's Ship, 1811. MS.	Sir Wm. Blizard.
	Persian Recreations, or Oriental Stories, with Notes, by Philoxenus Secundus. 12°	Rev. Stephen Weston.
	A Grammar of the Malayan Language, with an Introduction and Praxis, by William Marsden, F. R. S.	William Marsden, Esq.
	Transactions of the Society instituted at London for the Encouragement of Arts, Manufactures, and Commerce. Vol. XXIX. 8°	The Society of Arts.
	A Meteorological Journal kept on Board the H. E. I. Company's Ship Elphinstone, in her Passage from China to England in 1811. MS.	Capt. M. Craig.
23.	A Series of Plates of the Brain, with References exhibiting the Appearances of that Organ in the different Stages of Dissection, and Descriptions of the same, with Directions for the Development of that Organ by Dissection, &c. by Alex. Ramsay, M. D. 4°	Dr. Alex. Ramsay.
30.	History of the Royal Society from its Institution to the End of the 18th Century, by Thomas Thomson, M. D. F. R. S. &c.	Mr. R. Baldwin.
	The Philosophical Magazine for April, 1812.	Mr. A. Tilloch.
<i>May 7.</i>	A Journal of Natural Philosophy, Chemistry, and the Arts. No. 145 and 146.	Mr. W. Nicholson.
	The Critical Review for April, 1812.	The Proprietor.
	Démonstrations Botaniques, ou Analyse du Fruit considéré en général, par M. Louis Claude Richard, &c. 12°	M. L. C. Richard.
28.	Notes on the Mineralogy of Part of the Vicinity of Dublin, taken principally from the Papers of the late Rev. Walter Stephens, A. M. 8°	The Master and Fellows of Trinity College, Dublin.
	Annual Report of the Royal Humane Society for the Recovery of Persons apparently drowned, 1812. 8°	Dr. John C. Lettsom.
<i>June 4.</i>	The Philosophical Magazine for May, 1812.	Mr. A. Tilloch.
	A Journal of Natural Philosophy, Chemistry, and the Arts. No. 147.	Mr. W. Nicholson.
	The Critical Review for May, 1812.	The Proprietor.
	A Plate of Meteorolites.	Mr. John Sowerby.

TO THE

MDCCCXII.

# INDEX.

<i>Antimony</i> , protoxide of, its composition,	page 197
<i>Antimoniane</i> , the name given to a compound of antimony and chlorine,	190
——— composition of,	189, 190
<i>Apparatus</i> , description and mode of using one employed by Mr. BRODIE in ascertaining the changes produced on air by the respiration of animals,	380, 381
<i>Arsenic</i> , on its combinations with chlorine,	186
——— its effects on the animal system	209
——— does not produce its effects on the stomach, until it is carried into the blood,	210
——— its effects on a rabbit,	211
——— ——— on a dog,	212
——— its action on the system less simple than that of the majority of vegetable poisons,	214
<i>Arsenicane</i> , the name given to a compound of arsenic and chlorine	188
——— properties and composition of,	186, 188
<i>Atmosphere</i> , changes produced in it by the natural respiration of rabbits,	383, 384
——— changes produced in it by the artificial respiration of rabbits,	384, 388
<i>Atmosphere, cometic</i> , extent of,	122
——— bright envelope of,	<i>ib.</i>
——— the disappearance of its transparent part, under the cover of the scattered light of the contracted envelope,	128
——— uncommon appearances in the dissolution of the envelope,	129
<i>Auk, little</i> , (Alca Alle) on the peculiar formation of its digestive organs	397, 398

## B.

<i>Balena Mysticetus</i> , an account of some peculiarities in the structure of its organ of hearing,	83
<i>Barytes, muriate of</i> , its effects on the animal system,	218
——— ——— on a rabbit,	218, 220
——— ——— on a cat,	218
——— its principal action on the brain, it also acts on the heart,	219
<i>Barytes, muriate of</i> , it affects the stomach, but in a less degree than arsenic,	221

# INDEX.

	<i>page</i>
BIOT and ARAGO, M M. Their investigations subsequent to those of M M. DELAMBRE and MECHAIN relative to the measurement of an arc of the meridian noticed, -	324
<i>Bismuth</i> , its combination with chlorine, - - -	190
——— <i>oxide of</i> , its composition, - - -	198
<i>Bismuthane</i> , the name given to a combination of bismuth and chlorine, - - -	190
<i>Bitter Spar</i> , on the primitive crystal of, - - -	161
BLACK, DR. His theory of the source of animal heat objected to, - - -	391
<i>Blood</i> , chemical researches on, and some other animal fluids, -	90
——— <i>serum of</i> , some remarks on its analysis, - - -	97
——— <i>coagulum of</i> , some experiments on it, - - -	100
——— <i>colouring matter of</i> , researches on it, - - -	102
——— effects of acids on it, - - -	104
——— effects of alkalies on it, - - -	107
——— effects of different chemical agents on it, - - -	108, 110
——— its general chemical habitudes, &c. prove it to be independent of iron, - - -	104, 106, 108, 112
BRANDE, WM. THOMAS, ESQ. His chemical researches on the blood and some other animal fluids, - - -	90
BRODIE, B. C. ESQ. His further experiments and observations on the action of poisons on the animal system, -	205
——— His further experiments and observations on the influence of the brain in the generation of animal heat, - - -	378

## C

<i>Camera lucida</i> , application of periscopic principles in its construction, - - -	376, 377
——— <i>obscura</i> , common, a defect in its construction noticed, -	371
——— <i>periscopic</i> , in which the defect in the common camera is obviated, - - -	372
——— causes of its superiority over the common camera explained, - - -	<i>ib.</i>
<i>Carbonic oxide and chlorine</i> , on a gaseous compound of, - -	144
——— physical properties of, - - -	145
——— chemical properties of, - - -	145, 147
<i>Cassowary</i> , (Casuarius Emeu), on its solvent glands, - -	399
<i>Chlorine</i> , an account of some experiments on its combinations with different metals, - - -	169

# INDEX.

	<i>page</i>
<i>Chlorine</i> , on its combinations with copper, - - -	170
----- with tin, - - -	176
----- with iron, - - -	181
----- with manganese, lead, zinc, arsenic, antimony, and bismuth, - - -	183
<i>Chyle</i> , on the composition of, - - -	91
----- properties of, - - -	92
----- <i>coagulum</i> of, its properties - - -	<i>ib.</i>
<i>Comet</i> , observations of one, with remarks on the construction of its different parts, - - -	115
----- observations of a second one, with remarks on its construction, - - -	229
----- the planetary body in its head, - - -	115
----- its apparent and real magnitude, - - -	118
----- its eccentricity and colour, - - -	<i>ib.</i>
----- its illumination, - - -	119
----- head of the, - - -	<i>ib.</i>
----- the colour and eccentricity of its light, - - -	120
----- its apparent and real magnitude, - - -	121
----- the transparent and elastic atmosphere about it, - - -	122
----- tail of the, - - -	123, 233
----- its greatest length and breadth, - - -	124
----- its curvature and general appearance - - -	125
----- its shortening, - - -	131
----- its return to the nebulous appearance, - - -	127
----- increasing darkness between the streams that inclose its tail, - - -	132
----- of its real construction and various parts, - - -	133
----- of the result of its perihelion passage, - - -	140
----- body of, - - -	229
----- chevelure of, - - -	232
----- remarks on its construction, - - -	233
<i>Cometic phenomena</i> , of the solar agency in their production, - - -	136
<i>Copper</i> , on its combinations with chlorine, &c. - - -	170
----- <i>native, submuriat</i> of, experiments on, - - -	173
----- its composition, - - -	175
<i>Copper, artificial submuriat</i> of, its composition the same as the native submuriat, - - -	176
<i>Gormorant</i> , ( <i>Pelecanus Carbo</i> ), on its solvent glands, - - -	396

# INDEX.

	<i>page</i>
CRAWFORD, DR. His theory of the source of animal heat noticed, - - - - -	391
Cuprane, the name given to a compound of chlorine and copper	170
——— properties of, - - - - -	171
——— composition of, - - - - -	172
Cupraneæ, the name given to a compound of chlorine and copper, - - - - -	170
——— properties and composition of, - - - - -	172, 173

## D

DAVY, JOHN, ESQ. On a gaseous compound of carbonic oxide and chlorine, - - - - -	144
——— His account of some experiments on the combinations of different metals and chlorine, &c. - - -	169
——— His account of some experiments on different combinations of fluoric acid, - - - - -	352
DAVY, SIR HUMPHRY. On some combinations of phosphorus and sulphur, and on some other subjects of chemical inquiry, - - - - -	405
DECANDOLLE, M. His observation on the effects of light on the succulent shoots of trees and herbaceous plants noticed,	317
DELAMBRE and MECHAIN, MM. Their investigations relative to a new measurement of an arc of the meridian noticed, - - - - -	324
DELAMBRE, M. His formulæ relative to the calculation of spheroids noticed, - - - - -	338
DUPUYTREN, M. His experiments on respiration noticed,	389

## F

Ferrane, the name given to a combination of chlorine and iron,	182
——— its composition, - - - - -	<i>ib.</i>
Ferraneæ, the name given to a combination of chlorine and iron, - - - - -	<i>ib.</i>
——— its composition, - - - - -	183
Fluids, animal, chemical researches on some, - - - - -	90
Fowl, common, (Phasianus Gallus), on its solvent glands, - - -	398

## G

Gas, fluoric acid, not to be obtained free from silex, as stated by some authors, - - - - -	359
Gas, fluoboracic acid, advantageous mode of making it, with precautions to be observed, - - - - -	365
——— specific gravity of, - - - - -	366

# INDEX.

	<i>page</i>
<i>Gas, fluoboracic acid</i> , quantity of it condensed by water greater, than of any other known gas, - - -	367
----- absorbed by sulphuric acid, peculiarities of this compound, - - - - -	366, 367
----- on its combinations with ammoniacal gas, - - -	368
----- their properties, - - - - -	369
----- peculiarities, and composition, - - - - -	369
----- <i>hydro-phosphoric</i> , the name given to a peculiar gaseous compound of hydrogen and phosphorus, - - -	411
----- its properties and composition, 408, 409, - - -	411
----- <i>muriatic acid</i> , additional experiments on, - - -	242
----- the effects produced by its electrization with oxygen gas, - - - - -	245
----- <i>oxymuriatic acid</i> , additional experiments on, - - -	242
----- <i>silicated fluoric</i> , an advantageous mode of procuring it, - - -	353
----- specific gravity of, - - - - -	354
----- composition of, - - - - -	355
----- quantity of it decomposed by water, - - -	357
<i>Gaseous compound</i> , on a peculiar one, obtained from hydro-phosphorous acid, - - - - -	408
GAY LUSSAC and THENARD, M M. Their researches on fluoric acid, &c. referred to, - - -	352, 353, 362, 365, &c.
<i>Glands, solvent</i> , on the different structures and situations of those in the digestive organs of birds, according to the nature of their food and particular modes of life, - - -	394
<i>Goose</i> , (Anas Anser), on its solvent glands, - - -	398
----- <i>Soland</i> , (Pelecanus Bassanus), on its solvent glands, - - -	395

## H

HATCHETT, CHARLES, Esq. His chemical researches on the varieties of coagulated albumen, referred to, - - -	100
<i>Heat</i> , none generated in an animal in which the brain has ceased to perform its functions, - - -	388
----- <i>animal</i> , facts proving that it is much influenced by the nervous system, - - - - -	378, 379, 390
<i>Hemisphere</i> , of the penetration of one, by an indefinite number of equal and similar cylinders, - - -	310
HENRY, WM. M. D. His additional experiments on the muriatic and oxymuriatic acids, - - -	242
<i>Heron</i> , (Ardea Cinerea), on its solvent glands, - - -	395
HERSCHELL, WM. LL. D. His observations of a comet, with remarks on the construction of its different parts, - - -	115

# INDEX.

	<i>page</i>
HERSCHELL, WM. LL.D. His observations of a second comet, with remarks on its construction, - - -	229
HOME, EVERARD, Esq. His account of some peculiarities in the structure of the organ of hearing in the <i>Balæna Mysticetus</i> of LINNÆUS, - - -	83
----- His observations intended to shew that the progressive motion of snakes is partly performed by means of the ribs, - - -	163
----- On the different structures and situations of the solvent glands in the digestive organs of birds, according to the nature of their food and particular modes of life, - - -	394
HUNTER, Mr. His description of the <i>membrana tympani</i> of the piked whale, quoted, - - -	85

## I.

<i>Iron</i> , on its combinations with chlorine, - - -	181
— <i>spar</i> , on its primitive crystal, - - -	161
IVORY, JAMES, Esq. On the grounds of the method which M. LAPLACE has given in the second chapter of the third book of his “ <i>Mécanique Céleste</i> ,” for computing the attractions of spheroids of every description - - -	1
----- His appendix to the preceding paper, containing a short account of a memoir of M. LAGRANGE’s, with observations on the same, - - -	34
----- On the attractions of an extensive class of spheroids, - - -	46

## K

KNIGHT, THOMAS, Esq. Of the attractions of such solids as are terminated by planes; and of solids of greatest attraction, - - -	247
----- Of the penetration of a hemisphere by an indefinite number of equal and similar cylinders, - - -	310
KNIGHT, THOMAS ANDREW, Esq. On the motions of the tendrils of plants, - - -	314

## L

LAGRANGE, M. A short account of his memoir, entitled “ <i>Eclaircissement d’une Difficulté singulière qui se rencontre dans le Calcul de l’Attraction des Spheroides très peu différens de la Sphere</i> ,” with observations on the same, - - -	34
--	----

# INDEX.

	<i>page</i>
LAMBTON, MAJOR WILLIAM. His measurement of an arc of the meridian in Bengal, noticed and examined, -	340
LAPLACE, M. On the grounds of the method given in the second chapter of the third book of his " <i>Mécanique Céleste</i> ," for computing the attractions of spheroids of every description - - - - -	1
----- view of his methods of analysis employed in computing the attractions of spheroids in general, -	5
<i>Lead</i> , on its combination with chlorine, - - -	184
----- yellow oxide of, its composition, - - -	196
<i>Libarius, liquor of</i> , a remarkable property it exhibits with oil of turpentine, - - - - -	177
<i>Light</i> , its effects upon the tendrils of plants, - - -	315
----- difference of its effects on certain vegetable substances, -	317
<i>Lime, carbonate of</i> , on its primitive crystal, - - -	159
<i>Lymph</i> , properties of, - - - - -	96
----- analysis of, - - - - -	<i>ib.</i>

## M.

<i>Magnesia, muriat of</i> , changes produced in it by the agency of heat under particular circumstances, - - -	193
<i>Manganese</i> , on its combination with chlorine, - - -	183
----- properties and composition of, - - -	183, 184
<i>Membrana Tympani</i> , in the whale-bone whale, its description, -	84
<i>Meridian</i> , observations on the measurement of three degrees of the, conducted in England by Lieut. Col. W. MUDGE, -	321
<i>Metals</i> , on the combination of some with chlorine, - - -	169
----- on the relation between the proportion of oxygene and chlorine, with which some of them combine, -	193
----- on the relation between the proportion of sulphur and chlorine, with which some of them combine, -	198
<i>Microscope</i> , on a periscopic one, - - - - -	370
----- on the advantages of one constructed on periscopic principles - - - - -	375, 376

## N.

NEWTON, Sir ISAAC. The hypothesis he adopted relative to the figure of the earth noticed, - - -	2, 322
---	--------

## O.

<i>Organ of hearing</i> , an account of some peculiarities in the structure of, in the <i>Balæna Mysticetus</i> of LINNAEUS, -	83
--	----

# INDEX.

	<i>page</i>
<i>Ostrich, American</i> , ( <i>Rhea Americana</i> ), its solvent glands fewer than in other birds, their structure, &c. -	399
——— <i>African</i> , ( <i>Struthio Camelus</i> ), on its solvent glands, -	400
——— on its gizzard, -	<i>ib.</i>

## P.

<i>Parrot</i> , ( <i>Psittacus Æstivus</i> ), on its solvent glands, -	399
<i>Phosgene</i> , or <i>Phosgene gas</i> , the name given to a gaseous compound of carbonic oxide and chlorine, -	151
<i>Phosphorus</i> , of some combinations of, -	406
——— on its combinations with chlorine, -	406, 407
<i>Pigeon</i> , ( <i>Columba Domestica</i> ), on its solvent glands, -	398
<i>Planes</i> , of the attraction of those bounded by right lines, -	248
<i>Plants</i> , on the motions of their tendrils, -	314
<i>Plumbane</i> , the name given to a compound of lead and chlorine, -	185
——— its composition, -	<i>ib.</i>
<i>Poisons</i> , further experiments and observations on their action on the animal system, -	205
——— mineral, conclusions respecting their agencies on the animal system, -	226
<i>Presents</i> , list of those made to the Royal Society from November 1811 to June 1812, -	417
<i>PRIESTLEY</i> , Dr. His experiments on fluor acid air noticed, -	357, 358
<i>Prism</i> , of the attraction of an infinitely long one, whose base is any right lined figure whatever, -	302
<i>Prisms</i> , of their attraction, -	263
<i>Problem, geometrical</i> , one remarkable for generality and simplicity of result, -	310
<i>Pyramids</i> , of their attraction, and generally, of any solids whatever that are bounded by planes, -	257

## R.

<i>Rabbits</i> , experiments on the changes produced in atmospheric air by their natural respiration, -	383, 384
<i>Rabbits</i> , experiments on the changes produced in atmospheric air by their artificial respiration, -	384, 388

## S.

<i>Sabrina</i> , the name given to an island recently formed by a volcano, near St. Michael's, -	158
<i>Snakes</i> , observations intended to shew that their progressive motion is partly performed by means of the ribs -	163

# INDEX.

	<i>page</i>
<i>Solids</i> , on the attraction of such as are terminated by planes, and those of greatest attraction, - - -	247
— on the attraction of any whatever, that are bounded by planes, - - -	257
— of the attraction of some not terminated by planes	269
— of those of greatest attraction, - - -	283
<i>Spheroids</i> , of every description. On the grounds of the method which LAPLACE has given for computing the attractions of, - - -	1
— on the attractions of an extensive class of, - - -	46
— investigation of the attractions of a particular kind of,	60
<i>Stannane</i> , the name given to a compound of chlorine and tin,	177
— its properties and composition, - - -	177, 179
<i>Stannanea</i> , the name given to a compound of chlorine and tin,	177
— its composition, - - -	179
<i>Sublimate, corrosive</i> , its effects on the animal system, - - -	222
— on a rabbit, - - -	223
— on a cat, - - -	224
<i>Sulphur</i> , of some combinations of, - - -	412
SVANBERG, M. His memoir relative to the measurement of an arc of the meridian in Lapland noticed, - - -	325
<i>Swan</i> , ( <i>Anas Cygnus</i> ), on its solvent glands, - - -	398

## T.

<i>Tartar Emetic</i> , its effects on the animal system analogous to those of arsenic and muriate of barytes, - - -	221
<i>Theorem</i> , a remarkable one proposed, relating to solids of greatest attraction, - - -	301
TILLARD, S. Esq. His narrative of the eruption of a volcano in the sea off the Island of St. Michael, - - -	152
<i>Tin</i> , on its combinations with chlorine, &c. - - -	176
— oxides of, their composition, - - -	194
— submuriat of, its properties, - - -	180
<i>Turkey</i> ( <i>Meleagris Gallipavo</i> ), on its solvent glands, - - -	399

## V.

<i>Vine</i> , the effects of light on its tendrils, - - -	317
<i>Volcano</i> , a narrative of the eruption of one in the sea off the Island of St. Michael, - - -	152

## W.

<i>Water</i> , its relation to the composition of many bodies worthy of being studied, - - -	414
---	-----

# INDEX.

<i>Water</i> , combines with bodies in definite proportions, and occasions changes in their properties, - -	page <i>ib.</i>
WOLLASTON, W <sup>M</sup> . HYDE, M. D. on the primitive crystals of carbonate of lime, bitter spar, and iron spar, -	159
----- on a periscopic camera ob- scura and microscope, - - -	370
<i>Woodpecker</i> , ( <i>Picus Minor</i> ), on its solvent glands, -	397
<i>Woorara</i> , experiments with it on a cat and a rabbit,	107, 208

## Z.

<i>Zinc</i> , on its combination with chlorine, - -	185
<i>Zincane</i> , the name given to a compound of zinc and chlorine,	186
----- or <i>butter of zinc</i> , its properties and composition,	185, 186
<i>Zircone</i> , its peculiar relation to water, - -	415
